## PROFESSIONAL SUMMARY

- ❖ As a second-year student, I am passionate about web development and have been sharpening my skills in front-end technologies. I specialize in creating dynamic and responsive user interfaces using React. Additionally, I have a foundational understanding of backend development, particularly within the MERN stack (MongoDB, Express.js, React, and Node.js).

## EDUCATION

- ❖ Computer Engineering | Chitkara University, Punjab, CGPA: 9.01
- ❖ XII (CBSE) | Dellmond International School, Marks: 76.4

## SKILLS

- ❖ Frontend: React JS, Tailwind CSS, Figma
- ❖ Backend: Node JS, Express JS, MongoDB
- ❖ Data structure using C++
- ❖ Other tools: GIT, Postman, VSCode

## PROJECTS

- ❖ **Dashboard App:** Discover and explore a dynamic dashboard app built with React, featuring columns for articles, books, and people.

- ❖ **CRUD:** This project is based on an account management system powered by MongoDB, express, and nodeJS. This project facilitates efficient user account management by creating, reading, updating, and deleting (CRUD).

- ❖ **Food ordering website:** Experience the convenience of our food ordering website built using React JS. Browse through
